

Pumpkin Patch

September 27, 2011

Mr. Randy Anderson and his students from the Agriculture/Small Engines Program have been working since late spring to provide a pumpkin patch for our children. On Tuesday, September 27, they also provided special transportation for a "Pumpkin Patch Ride.": The children were able to pick their own special pumpkin and bring it back to the Center. The children were then able to use their pumpkins for special language experiences and match activities before taking them home. We are so thankful to Mr. Anderson and this program for providing these experiences for us.
