

HeartCode™ ACLS

An Official American Heart Association ACLS eLearning Program

An alternative to traditional, classroom-based ACLS training, HeartCode™ ACLS is a self-directed, comprehensive eLearning program from the American Heart Association. The full course combines an interactive, cognitive portion completed online, with CPR skills training. It includes interactive patient cases that test the user's ability to apply the ACLS algorithms to effect treatment. Users can practice and test their skills on a Voice Assisted Manikin (VAM) or with a certified AHA ACLS Instructor. HeartCode™ ACLS includes interactive patient cases that test the student's ability to apply the ACLS algorithms to effect treatment. HeartCode™ ACLS will provide your team the benefits of standardized ACLS instruction and improved competency, and may also save time and money compared to traditional classes.

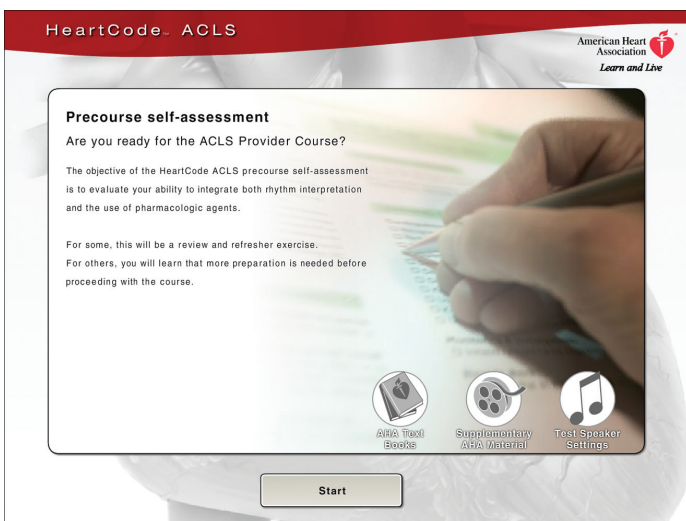

Students are able to participate in real-life patient scenarios, assess the patient and formulate treatment through interactive simulation technology.

ISBN: 978-0-87493-915-6

Product: 80-1516

Who benefits from this product?

This product is intended for healthcare professionals requiring an ACLS Provider Card or seeking continuing education.

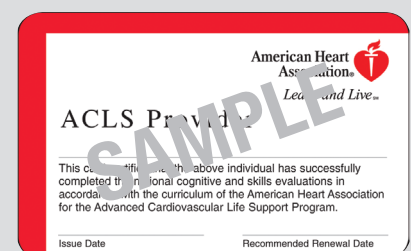

Students can earn or renew their provider card in three easy steps!

1. Complete the cognitive computer-based portion
2. Complete skills practice and a skills test on a Voice Assisted Manikin

OR

with a certified AHA ACLS Instructor

3. Receive an official AHA ACLS Provider card

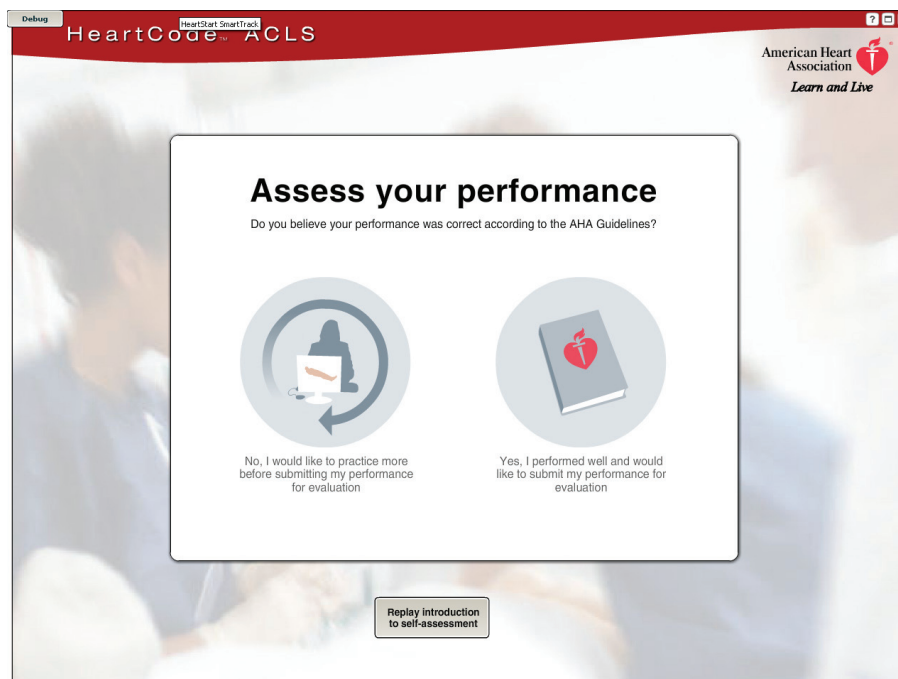

HeartCode™ ACLS Features (80-1516)

- Ten interactive patient cases in hospital-based scenarios, using microsimulation technology
- Students assess patients, formulate treatment allowing user to “virtually” treat adult patients
- Immediate feedback and evaluation mechanism educates students on correct and incorrect actions through intelligent debriefing
- Full text (in PDF format) of the ACLS Provider Manual, 2005 AHA Guidelines on CPR and Emergency Cardiovascular Care and the ACLS Core Drugs reference guide.
- Team dynamics lesson
- Pre-course self-assessment gauging knowledge of ECG recognition and pharmacology

Benefits

- Available to providers at their convenience anytime, anywhere
- Improve ACLS skills by receiving instant, objective feedback and evaluation through intelligent debriefing that reviews the student’s patient interventions and provides suggestions for improvement
- Maintain a high level of professional competency and standardization
- Save time by completing the certification process faster
- May help reduce costs associated with training
- Up to 14 hours CME/CE/CEH credit upon successful completion of Part 1 cognitive portion
- Engaging interactive content
- Self-paced instruction to accommodate different learning styles
- Access the patient scenarios and AHA text material for up to 2 years

Available in various delivery methods to suit your institution's needs.
